COMPLETE HEATING & AIR CONDITIONING MATERIALS

**THE MOST COMPLETE SERVICE AVAILABLE
TO THE WARM AIR HEATING TRADE IN CANADA**

TO ALL OUR CUSTOMERS AND FRIENDS

It is with great pleasure that the Management and Staff of Continue-Flo Heating Products Limited introduce their new 1961 Continue-Flo Pocket Catalogue which has proved so popular to the heating industry throughout the Dominion of Canada.

One of the prime reasons for this Continue-Flo popularity is the many outstanding products developed, manufactured and distributed under this name, providing a complete source of supply to the Air Conditioning and Warm Air Heating trade.

A far-sighted research program is constantly developing new and better products for the rapidly changing industry to extend the further services that we find, from time to time, are required by you, our customers.

Our personnel are fully trained with the utmost in modern equipment and know how to produce the highest quality products at the lowest cost — YOUR ONE DEPENDABLE SOURCE FOR OIL AND GAS BURNERS, FURNACES, FITTINGS, REGISTERS AND COMPLETE INSTALLATION MATERIALS.

The Personnel at Continue-Flo Heating Products Limited take great pride in the knowledge given them by the Industry — realizing, of course, that one of the most important parts of your retail business is personalized and efficient service to your customers. It is our purpose, and would be our privilege, to have the opportunity of providing you with this service in order that you might serve your customers better.

YOU, OUR CUSTOMER, IS THE MOST IMPORTANT ASSET WE HAVE. We deem it a great pleasure to serve you. Your criticisms and suggestions are always welcome.

Quality and Service at competitive prices.

May we have the opportunity of offering you these services.

MANAGEMENT AND STAFF.

CONTINUE-FLO PRODUCTS

CONTINUE-FLO PRODUCTS CANADA'S LEADING PRE FAB HEATING MATERIALS PLANT

and

Complete Warm-Air Heating & Air Conditioning Supply House

Constantly bringing to the heating trade better, and at less cost, products and methods of application of heat distribution materials. WE WELCOME the opportunity of proving our statements through the many services we offer.

- ★ Drafting and layout service to our customers.
- ★ Information and advice on any heating problems.
- ★ Listings and costing of materials PER HOUSE, PER DESIGN.
- ★ Complete package service of furnaces and heating materials PER HOUSE, PER DESIGN.
- ★ Engineering manuals, catalogues and descriptive literature on equipment and materials.
- ★ "On the job" help as to layout and advice where CONTINUE-FLO HEATING units and installation materials are to be installed.
- ★ Fast Service to any place in Canada. — Higher Quality at Competitive prices.
- ★ For "Prepayment and Freight Allowance Policy" see pages 3 and 4. WE KNOW that you will find this Freight Prepayment and Allowance programme very attractive.

CONTINUE-FLO PRODUCTS

GENERAL INFORMATION

PRICES:

All prices in this catalogue are Net Prices including Federal Sales Tax where applicable. **WE SERVICE THE WHOLESALE TRADE ONLY.**

TERMS:

Our terms of payment are 2% 10 days, Net 30 days on approved credit.

SHIPPING INSTRUCTIONS:

Please indicate on order how you want goods shipped: EXPRESS, TRANSPORT (name of company), FREIGHT, etc. If you do not instruct us we will ship via carrier who we consider will give you the best service **AT THE LOWEST COST.**

ORDERS:

In order that we may give fast and efficient service please give complete information on orders — **MODEL NUMBER, DESCRIPTION, ETC., AS INDICATED IN CATALOGUE.**

BACK ORDERS:

Should it at any time become necessary to back order any goods it is the policy of this company to notify the customer immediately in order that the customer can advise as to disposition of the order.

STOCK:

CONTINUE-FLO HEATING PRODUCTS LIMITED endeavours to carry ample stock to accommodate our customers. However, we do not attempt to indicate Stock and Non-stock items. Same day delivery is our purpose at all times.

SPECIAL SERVICES:

We appreciate the many problems that confront the heating trade from time to time; therefore, we have trained personnel who will be pleased to provide prompt and accurate information when required. We also maintain Costing and Drafting departments solely for the purpose of assisting the Trade. These services are available and we welcome your enquiries.

RETURNED GOODS:

No goods may be returned without our permission and are subject to a 10% **HANDLING CHARGE.**

GUARANTEE:

All goods are sold by CONTINUE-FLO HEATING PRODUCTS LIMITED on a **MONEY BACK OR REPLACEMENT BASIS** for the length of the manufacturer's warranty.

But we do not assume any liability for consequential damage.

On the return of such goods and they must be returned on a pre-paid basis. **THIS CATALOGUE SUPERSEDES ALL PREVIOUS PRICE LISTS OR CATALOGUES AND IS EFFECTIVE MARCH 15, 1961 AND PRICES THEREIN ARE SUBJECT TO CHANGE WITHOUT NOTICE.**

ONTARIO DEALER PREPAYMENT & FREIGHT ALLOWANCE SCHEDULE Effective February 15th, 1961

CONTINUE-FLO offers to its dealers freight prepayment or allowance plans which are superior to any in the trade.

Certain items, due to their nature, are of necessity excepted from such plans.

The following are the plans available to Dealers in various parts of the country.

LOCAL — Along Lakeshore Road to and including Metropolitan Toronto and all intermediate points FREE daily delivery is made by our trucks throughout the year.

SOUTHERN ONTARIO — South of a line drawn from and including Sault Ste. Marie, North Bay, Mattawa and all intermediate highway points, bounded by the Ottawa River to the St. Lawrence River, Lake Ontario, Lake Erie, Lake Huron and Georgian Bay. On orders of \$75.00 or more, excluding furnaces, water heaters, unit heaters, fuel oil tanks, sonocairduct, B vent, sheet metal machinery, trough and 10 ft. conductor pipe, we will prepay the freight.

NORTHERN ONTARIO — Everything North to a line drawn from Sault Ste. Marie, North Bay and Mattawa, excluding all intermediate highway points. On orders of \$100.00 or more, with the exception of pipe, furnaces, water heaters, unit heaters, fuel oil tanks, sonocairduct, B vent, sheet metal machinery, trough and 10 ft. conductor pipe, a 5% freight allowance will be allowed on the net amount of the invoice.

PIPE — On orders of 1,000 ft. or more of 5 ft. pipe, mixed sizes, a 5% freight allowance will be allowed on the net amount of the invoice.

NOTE — The above amounts of \$75.00 and \$100.00 are for one order, on one shipment, to one destination only.

SEE PAGE 4 FOR BALANCE OF SCHEDULE.

Speedy Service Always — Goods In Stock.

PREPAYMENT SCHEDULE FOR EASTERN PROVINCES

Effective February 15th, 1961

(Continued from previous page)

QUEBEC, MARITIME PROVINCES, NEWFOUNDLAND, NEW BRUNSWICK, NOVA SCOTIA, PRINCE EDWARD ISLAND.

All orders of \$150.00 or more, with the exception of Pipe, Furnaces, Water Heaters, Unit Heaters, Space Heaters, Fuel Oil Tanks, Sono-airduct, B Vent, Sheet Metal Machinery, Trough and 10 ft. Conductor Pipe, will be F.O.B. our warehouse, subject to a 5% freight allowance of the net amount of the invoice.

All orders of \$500.00 or more, with the exception of Pipe, Furnaces, Water Heaters, Unit Heaters, Space Heaters, Fuel Oil Tanks, Sono-airduct, B Vent, Sheet Metal Machinery, Trough, and 10 ft. Conductor Pipe, will be F.O.B. our warehouse, subject to a freight allowance of 5% and 5% of the net amount of the invoice.

SPECIAL NOTE:

The amounts of \$150.00 and \$500.00 are for one order, for one shipment, to one destination.

PREPAYMENT SCHEDULE FOR WESTERN PROVINCES

Effective February 15th, 1961

MANITOBA, SASKATCHEWAN, ALBERTA, BRITISH COLUMBIA.

All orders of \$150.00 or more, with the exception of Pipe, Furnaces, Water Heaters, Unit Heaters, Space Heaters, Fuel Oil Tanks, Sono-airduct, B Vent, Sheet Metal Machinery, Trough and 10 ft. Conductor Pipe, will be F.O.B. our warehouse, subject to a 5% freight allowance of the net amount of the invoice.

All orders of \$500.00 or more, with the exception of Pipe, Furnaces, Water Heaters, Unit Heaters, Space Heaters, Fuel Oil Tanks, Sono-airduct, B Vent, Sheet Metal Machinery, Trough and 10 ft. Conductor Pipe, will be F.O.B. our warehouse, subject to a freight allowance of 5% and 5% of the net amount of the invoice.

SPECIAL NOTE:

The amounts of \$150.00 and \$500.00 are for one order, for one shipment, to one destination.

METHOD OF MEASURING BASEMENT FOR REPLACEMENT HEATING SYSTEMS

1. Measure inside dimensions of basement from wall to wall, both length and width.
2. Measure from both walls to center of beam and give width and depth of beam.
3. Measure from nearest wall to center of chimney opening.
4. The wall from which number three measurement was taken will be the point from which all measurements marked #4 will be taken. #4 measurement is measured from that wall to the inside of joist closest to the register opening it is desired to locate.
5. Measure from the inside of joist nearest to the opening to the edge of opening
6. Measure from beam to edge of opening nearest beam. The beam will be the point from which all #6 measurements are taken.
7. Measure the opening size of the register box or stack.
8. Get diameter of flue opening.
9. Be sure to give ceiling height of basement, i.e. from floor to lower edge of joists, and joist centers, sizes and depths, for those joist spaces occupied by register boxes or stacks.
10. **Return Air.** Measure all return air openings in the same manner as you did the warm air and give size, type and whether return air on second or first floor.
11. Using the same measuring points as 4 & 6, measure any water or gas pipe or other obstruction which may interfere with the heating layout.
12. If furnace is already installed give make, model and cabinet size, also using same measuring points as 4 & 6, measure furnace location.
13. Show basement stair location, measurement and direction of rise in relation to center beam.
14. If sending measurements in for layout & heat loss, be sure that measurements and locations of all rooms, windows and doors are clearly sketched and the type of construction and insulation are indicated. This will enable us to process the layout in the minimum amount of time and eliminate any inconvenience to you or your customers.

HOW TO ADJUST A SYSTEM FOR CONTINUOUS AIR CIRCULATION

1. Make sure that thermostat has been located so that it is not affected by heat sources other than room temperature. Adjust thermostat to its closest practicable differential setting. If close setting of differential is not possible, recommend replacement.
2. See that warm air registers and return air faces are open. If system has been balanced, leave dampers set, for present.
3. Check filters. Filters should be reasonably clean.
4. Adjust blower speed and controls. The blower should run so that there is a 90°F temperature rise through the furnace. Insert the thermometer in the extended plenum or a short branch duct to avoid the radiant heating effect in the bonnet.
Air volume need only be sufficient to adequately supply run having most resistance. High register velocity is not desirable or necessary with C.A.C. Set blower control "cut out" as low as practicable, usually from 85° to 110°. Set blower control "cut in" at minimum differential, approximately 15° higher than "cut out".
5. Set Limit Control "cut out" at 250°, or follow furnace manufacturer's instructions.
6. Adjust diffusers so that air is properly diffused upward, blanketing the windows and outer walls. If limit control cannot be set independently of blower control, recommend new instrument.
7. Adjust dampers to properly balance system for the revised air delivery. Set thermostat to produce "comfort zone" for occupants. This is usually 70° and 75°. Changes in setting, up or down, should be made 1° at a time until satisfactory. For further explanation of the principles involved in C.A.C. refer to Manual 6, published by the National Warm Air Heating and Air Conditioning Assoc. If outside air is introduced into the system, do not attempt to set for CAC during periods when outdoor temperature is above 50°.

GOOD SOUND ADVICE TO THE TRADE

May we suggest that before attempting any specific heating design you first obtain a set of NATIONAL WARM AIR HEATING & AIR CONDITIONING MANUALS.

These Manuals are the basis on which all Heating systems must be designed if they are to meet the requirements of City Engineers and Municipal By-Laws, Central Mortgage & Housing Corporation, Veterans Land Association and most other governing bodies.

Continue-Flo Heating Products Limited will be pleased to supply any one of the following Heating Design Manuals, published by the National Warm Air Heating Association, at the net price plus a postage and handling charge of 50c.

Curved air flow vanes are set at the correct angle to deliver a perfect fan-shaped air pattern. If an air pattern other than factory setting is required, vanes may easily be adjusted with long nose pliers.

Dial operator works easily with a touch of the toe, opens valves with a smooth counter-action that gives an even flow of air across the face. Wafer-thin valves reduce resistance. Deep side margins hold diffuser in place.

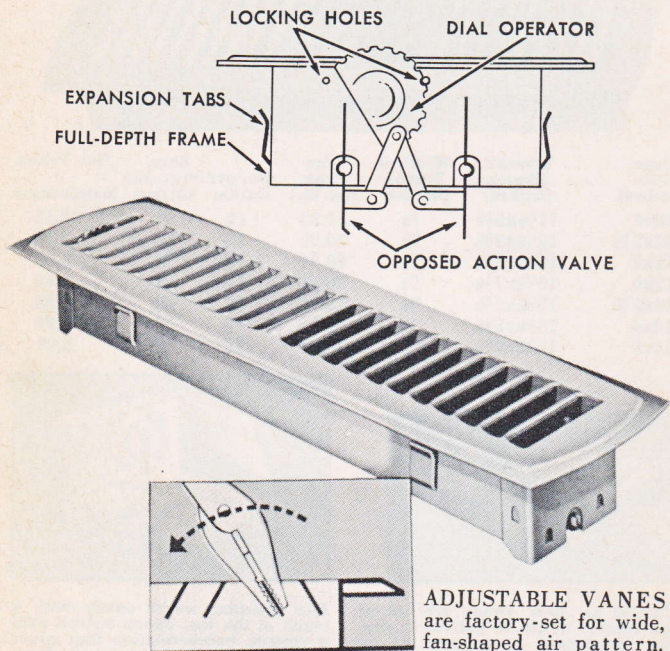

Adjusto-Stop is easily set with a screw driver to balance system.

Opposed-action valve spreads the air stream evenly over the diffuser face and directs the air upward in a vertical pattern.

CONTINUE-FLO PRODUCTS

NEW NO. 150 SERIES ECONOMY FLOOR DIFFUSERS

ADJUSTABLE VANES are factory-set for wide, fan-shaped air pattern. Easily adjustable to fit the air pattern to the requirements of the installation.

Low-cost, attractive grilles with exceptionally large free areas. Popular for centralized returns in residential systems, excellent for the large capacities required in commercial work. One-piece, heavy-gauge steel construction with rugged angle frame to add stiffness and strength (also available without frame on special quantity orders). Full-depth frets, set at 22° angle, conceal opening.

* Opening Size Required:

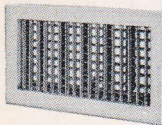

Style 600 requires same size opening as listed size.

Styles 610 and 611 require 5/16" wider opening than listed size.

CONTINUE-FLO PRODUCTS

AIR CONTROL MULTI-TROL Double Deflection Registers

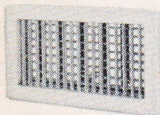

4 Way Directional Control With Opposed Action Shallo-Valve

Style VHV

Style VHV — Registers have adjustable vertical front bars, adjustable horizontal second row bars and vertical louvered Shallo-Valve.

This combination of two rows of adjustable airfoil bars plus the Shallo-Valve gives complete control of the air in both planes plus exacting volume control. The smooth opposed action of the Shallo-Valve louvers distributes the air flow over the entire face. Valve is operated from the face with attractive key — may be removed or snapped permanently in place. Both rows of bars are easily adjusted with adjusting key furnished.

Style HVV

Style HVV — Registers are similar to Style VHV. Have adjustable horizontal front bars, adjustable vertical second row bars and vertical louvered Shallo-Valve.

Single Deflection Registers

Two-way Directional Control with Opposed Action Shallo-Valve

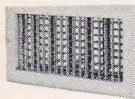

Style VOV — Registers feature adjustable vertical front bars and vertical louvered Shallo-Valve.

One row of sturdy adjustable air foil bars gives positive two-way air deflection in one plane. Shallo-Valve insures exacting volume control. Its smooth opposed action louvers distribute the air flow over the entire register face. Valve is operated from the face with an attractive key which may be removed or snapped permanently into place. Bars can be easily adjusted to desired angle of deflection with the adjusting key furnished.

Style VOV

Style HOV — Registers are similar to Style VOV except that they have adjustable horizontal front bars and a vertical louvered Shallo-Valve.

Style HOV

CONTINUE-FLO PRODUCTS

AIR CONTROL MULTI-TROL Double Deflection Grilles

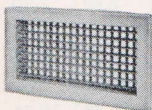

Four-Way Deflectional Air Control

Style VH — Grilles have adjustable vertical front bars with adjustable horizontal bars in the rear row.

Style VH

Both horizontal and vertical air control is assured with this combination of two rows of air foil bars for four-way deflection. Streamlined bars are spaced at just the right distance, both horizontally and vertically, for maximum performance and attractive appearance. Both front and back bars can be easily adjusted to the required deflection with a furnished adjusting key.

Style HV

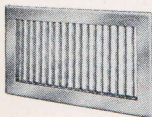

Style HV — Grilles are similar to Style VH except that they have adjustable horizontal front bars and adjustable vertical back bars.

Single Deflection Grilles

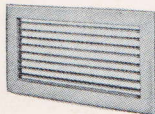

Two-Way Directional Air Control

Style VO — Grilles feature adjustable vertical front bars, easily adjustable for any desired air pattern on a horizontal plane.

These Air Control Single Deflection Grilles give complete two-way air control. A single row of specially designed air foil bars deflect air with a minimum of resistance. Bars are sealed into margins and cannot pull out, yet are easily adjusted to the desired angle of deflection with a furnished adjusting key. Formed construction gives them greater strength and pleasing appearance.

Style VO

Style HO

Style HO — Grilles are very similar to the Style VO. They feature a row of adjustable horizontal front bars for complete vertical air deflection.

CONTINUE-FLO PRODUCTS

AIR CONTROL MULTI-TROL Fixed Deflection Registers

Style **VOVX** — has vertical face bars; Style **HOVX**, horizontal. Face bars are set straight out. Solidly anchored to frame, they can't come loose. Vertical Shallo-Valve provides positive air volume control and is easily adjusted, with a removable key, through the face of the register. Margin provides 1-inch overlap beyond duct size.

Style **VX** — has vertical face bars, set straight out; Style **HX**, horizontal face bars, set 22½° angle (available straight out if specified). Both are excellent matching grilles for use with Multi-Trol registers. Face bars are solidly anchored to frame — can't pull out. Margin provides 1-inch overlap beyond duct size.

CONTINUE-FLO V-100 "CUSTOMLINE" SERIES GAS FURNACES

**BUILT
WITH
ARMCO
ALUMINIZED
STEEL**

THE V-100 "CUSTOMLINE" LO-BOY
Continue-Flo's Customline Lo-boy is the answer to limited space where headroom is unavailable. Neat in appearance, with lifetime construction and "WHISPER-QUIET" operation, the Lo-boy assures maximum comfort and trouble-free, economical operation.

THE V-100 "CUSTOMLINE" HI-BOY
Continue-Flo's Customline Hi-boy — designed as a space-saver unit where limited floor space is available. Beautiful in appearance, it is engineered to give the utmost in heating satisfaction and economy.

CANADA'S FINEST GAS-FIRED FURNACES C.G.A. and C.S.A. Approved

GOOD LOOKS — The most compact line of Gas-Fired Forced Air Heating Units in Canada — beautifully styled — a decorative, space-saving asset, adding to the appearance of any basement or utility room.

The appearance is accentuated by the soft pastel shades of dawn gray and floral pink.

SAFETY FACTOR — The burner is so designed as to be the ultimate in safety, allowing smooth, uninterrupted pilot flame lighting — "WHISPER-QUIET" ON and OFF operation. The most modern in controls assures positive lighting and 100% shut-off in any emergency.

Faultless, pre-tested construction, matched with foolproof safety, gives you Canada's finest Gas Heating Furnace.

CONSTRUCTION — "BUILT TO LAST A LIFETIME" — welded steel body and heat exchanger fabricated from ARMCO prime aluminized steel and encased in 22-gauge satin finish automobile steel. Furnace is built on a steel base, hermetically sealed, eliminating completely any dirt or foreign matter entering the furnace or air stream in circulating areas. Steel angle iron skids eliminate the necessity of grouting and allow for complete air circulation under the entire furnace. Less noise — more efficiency. 20-YEAR WARRANTY.

COMFORT — ECONOMY — Extensive pre-testing and field tests assure incomparable comfort and economy with "WHISPER-QUIET", uninterrupted, trouble-free operation, provided by the most modern design in heat exchanger, which allows approximately 64 square inches of extra heating surface per section, assuring phenomenal economy never before available.

P L U S . . .

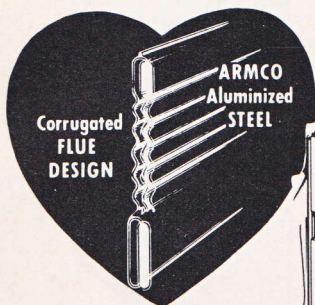

WHAT 20-YEAR WARRANTY MEANS TO YOU

That you can feel confident and happy in the knowledge that only quality materials and skilled workmanship are employed in the construction of your furnace, enabling Continue-Flo to back their product with this 20-year warranty.

CONTINUE-FLO PRODUCTS

CONTINUE-FLO SERIES "SR" Oil-Fired Lo-Boy Conversion Furnaces

Realizing the value and the potential of the replacement market for forced warm air furnaces, Continue-Flo is pleased to provide for you, our Dealer, the opportunity of buying our quality Continue-Flo furnaces for this application. These units are available in capacities from 85,000 to 200,000 B.T.U. per hour and are our Deluxe "S" models less burner, controls, humidifier and accessories. Furnaces for this purpose are designated by the letters "SR". As we have no control over the firing device used the warranty on these models is 5 years from date of installation and each furnace will bear a sticker to this effect.

CONTINUE-FLO SERIES "HB" Oil-Fired Hi-Boy Furnaces

We, at Continue-Flo, know you will be pleased that we now have a complete line of oil-fired hi-boy furnaces in capacities from 85,000 to 160,000 B.T.U. You are assured of efficient, trouble-free operation as we have built into this equipment all of the quality and features that have made our Lo-Boy series so highly regarded from coast to coast.

- COMMERCIAL
- INDUSTRIAL

FOR COMFORT
AND
ECONOMY

Quality — Long Life — Customer Satisfaction.

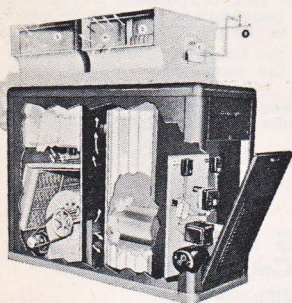

CONTINUE-FLO PRODUCTS

CONTINUE-FLO OIL-FIRED HEAVY DUTY FURNACES

FEATURES

- 1 Attractive cabinet with gracefully rounded corners, finished in smooth baked hamperlaid enamel. Chrome hardware.
- 2 Heavy gauge heat exchanger of modern design, adds more radiating surface, and increases efficiency.
- 3 Pre-Heater of tubular construction, preheats the return air. This reduces flue gas temperature, and saves fuel.
- 4 Burner and all controls enclosed, and out of reach of children; but readily accessible for maintenance.
- 5 Stainless steel combustion chamber directs heat to all surfaces, including the bottom.
- 6 The rubber mounted oversize fan unit produces abundant air volume at slower speeds, affording WHISPER QUIET operation.

Furnace Warranty

No. 11765

This furnace covered by this warranty is warranted to be free from defects in material and workmanship. Should any defect in material or workmanship be discovered within the warranty period, the manufacturer will, at its option, repair or replace the defective part or parts without charge. (a) Where heat exchanger fabricated of Arnon Aluminized Steel within 10 years from the date of installation without charge except for the cost of transportation. (b) Where heat exchanger fabricated of Mild Steel within 5 years from the date of installation without charge except freight within 10 miles. (c) Such defective part must be returned to us transportation charges prepaid.

CONDITIONS

1. Furnace must have been installed by a competent and licensed heating dealer.
 2. The limit control has been placed in the correct location and adjusted to the proper setting so as to limit the warm air temperature as recommended by The National Board of Fire Underwriters and Canadian Standards Association, except where furnace factory specifications are different.
 3. The furnace must not have been fired over its listed maximum capacity.
 4. The heating system was installed according to the minimum requirements of The National Warm Air Heating and Air Conditioning Association.
 5. The furnace must be fired with a Bureau approved and supplied by Continue-Flo Heating Products Limited.
 6. The furnace has not been moved from the site of its original installation.
 7. All information on the guarantee form and with must be completed and the stub returned within 30 days from the date of installation to Continue-Flo Heating Products Limited, Hamilton, Ontario, to bind this warranty.
 8. We shall not be liable for labor involved during the removal or replacement of said parts.
- Continue-Flo Heating Products Limited does not authorize any representative, distributor, or dealer to alter, in any manner, the terms of this warranty.

STARFIRE "SFR" SERIES FOR OIL FIRING 5-Year Warranty

The "SFR" MODEL furnace is intended for use where a Dealer is replacing a customer's existing oil-fired furnace and wishes to remove the oil burner from the existing oil-fired furnace and install it in the "SFR" model furnace.

As we have no control over the firing device that will be installed in this equipment the furnace will bear a 5-year warranty from the date of installation.

The furnace will also bear a sticker assuring the Dealer and the customer that this furnace is sold for the express purpose above mentioned.

WHISPER-QUIET—Model CF-3000 GAS CONVERSION BURNER

EASY TO INSTALL — Telescopic design with clamping device and adjustable legs makes Continue-Flo Burners adaptable to all makes of furnaces.
SAFE — Automatic Gas Safety. Pilot recycles automatically under low pressure conditions. Automatically controlled. Ignition assured at all times.

Automatic Self Generating Electric Gas Valve prevents flow of gas to main burner when pilot is not lit. Noiseless operation.

ECONOMICAL — Cast Iron Manifold and Venturi Tube and Brass Orifice guarantees maximum efficiency, scientifically designed. Burns every cc. of either Propane or Natural Gas, and only the exact amount needed to give you the temperature you want.

SELF ENERGIZING CONTROLS — Gives you heat always, even when electrical power fails.

SMART APPEARANCE — Modern streamlined cabinet in Floral Pink and Dawn Grey enamel. Improves the appearance of any heating plant of any basement.

FIBERGLASS — AEROCOR For Use As DUCT WRAP or DUCT LINER SERIES PF-330

DESCRIPTION: Fiberglas Aerocor* Series PF-330 is a light weight, resilient thermal and acoustical insulation, bonded with a thermosetting resin. Three standard types are available:

PF-334 at a density of .5 lbs./cu. ft.

PF-335 at a density of .75 lbs./cu. ft.

PF-336 at a density of 1.0 lbs./cu. ft.

Each of these densities are available in standard thicknesses of 1/2" and 1" and widths of 36" and 72".

Made-to-order thicknesses may be obtained in the standard widths at no extra charge. For complete description see Fiberglas literature.

SLIT WIDTHS: Aerocor* is available on a made-to-order basis in slit widths, utilizing the full standard widths shown below. Add \$1.65 per 1000 sq. ft. to computed net price for slitting and packaging on one continuous tube. Add \$3.25 per 1000 sq. ft. to computed net price for slitting and packaging on individual tubes and wrapped separately.

PACKAGING: Standard stock packaged in compression packaged rolls on 2" I.D. tubes and wrapped, ends enclosed, with heavy kraft paper. Made-to-order packaged in rolls as specified for standard stock or in corrugated paper cartons.

MINIMUM QUANTITY: Standard stock — one roll of any thickness, width and density. Made-to-order — see accompanying table.

All prices are Dealer Net — Sales Tax Included — F.O.B. Hamilton, Ontario.

KLEEN-SPRAY

SOOT DESTROYER

**Rapidly removes soot deposits
from any coal or oil-fired
heating equipment.**

For Oil-Fired types

Spray directly on open flame until "Kleen-Spray" ignites. Have draft sections opened only slightly for a few minutes.

For Coal Furnaces

Fires should be at maximum heat. Spray generous amount of "Kleen-Spray" on hot coals. Leave furnace door and dampers open slightly for a few minutes after spray application, then resume normal heating.

If soot formation is excessive use Kleen-Spray Soot Destroyer at least 3 times per week.

Dispensing Containers:

Kleen-Spray Soot Destroyer is packed in a specially constructed container for purposes of producing a fine spray, safe to use, and a must for every home.

DIRECTIONS

Apply "Kleen-Spray" gently . . . For use in all types of Domestic oil and Coal Burners, Heaters, Cook Stoves and Fireplaces.

NATIONAL

Nye Heavy Duty Pipe Cutters

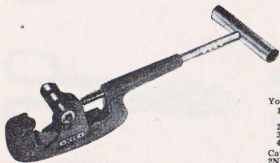

Every pipe cutter is checked for alignment and tested before leaving the factory. Wheel blocks travel on extra wide ways which assures continued alignment. Solid malleable construction and all steel handle makes this an exceptionally dependable and durable tool.

Catalog No.	Size Range	App. Shp. Wt. Lbs.	Net Price
1N	½"–1¼" (Uses 1 and 2N Wheels, Pins and Rollers)	6	\$14.55
2N	1½"–2" (Uses 1 and 2N Wheels, Pins and Rollers)	7	19.45

NYE 2NP PIPE CUTTER For Use With Power Units

½" to 2"

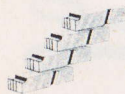

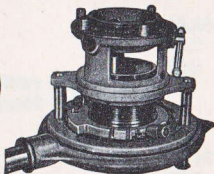

- Three Roller Balancing
- Long Sleeve Protects Thread
- Solid Malleable Construction

You'll find this amazing new cutter . . .
1.—is self-aligning! This feature assures square cuts — eliminates spirals.
2.—can be applied to pipe while pipe is in motion.
3.—cuts with much less effort.
4.—saves more than half your time!

Cat. No. 2NP Pipe Cutter for Power Units. Uses Nye 2N or 2R Wheels.
Approximate Shipping Weight 6 lbs.

Net Price
\$19.35

NYE No. 51B RATCHET PIPE THREADER

HIGH SPEED DIES

1. Cuts **Pipe Thread or Straight Thread** for plumbing, conduit or mechanical joints with one set of high speed dies on pipe sizes 1"–1¼", 1½"–2".
2. **Opens Automatically on Both Power and Hand Operation**, when approximately eleven threads have been cut. Cannot jam lead screw.
3. Opens manually at any time during cut if spin back knob is pulled out.
4. Chasers are always in open position when stock is being removed from pipe. Consequently they are not chased back over thread. This eliminates tearing and injury to threads or chasers.
5. Pipe size selector can be changed from one size to another in an instant. No screwing or unscrewing of lead screw. A simple adjustment is provided for deep or shallow threads.
6. Adjustable guide allows quick clamping to pipe by three jaws synchronized to operate with one movement of guide ring. Three turns of locking screw will tighten. Drip or crooked thread cut as readily as standard.
7. **Dual Purpose Spin Back Knob**, which operates like a fishing reel, permits turning stock back in a few seconds to starting position before removal from pipe. Pipe holder cannot spin off lead screw; stop is provided at the correct starting position for another thread. Pulling this knob causes the self-opening feature to operate.

CONTINUE-FLO PRODUCTS

GRAY-BONNEY

Regular Screw Drivers

Square Shank

Gray-Bonney Square Shank Screw Drivers are made with forged one-piece blades, from special alloy steel, carefully heat treated over their entire length. The handles are of the popular transparent type, which combines toughness and durability with attractive appearance. Screw drivers in the square series are primarily designed for strength and are confidently recommended for heavy work. Blades are formed with an upset shoulder, against which the handles are forced, and the method of anchoring the shank eliminates the possibility of loose handles.

No.	Length of Blade	Width of Tip	Overall Length	Dealer Net
S 04	4"	$\frac{5}{16}$ "	$7\frac{3}{4}$ "	\$1.54
S 06	6"	$\frac{7}{16}$ "	$10\frac{1}{4}$ "	2.14
S 08	8"	$\frac{1}{2}$ "	$12\frac{3}{4}$ "	2.63
S 012	12"	$\frac{1}{2}$ "	$17\frac{1}{2}$ "	3.34

Square Shank

Guarantee — Screwdrivers

Screwdriver Blades are heat treated throughout; broken blades can be reground or returned to factory for regrounding. We cannot accept responsibility for screwdrivers which have been abused.

Electricians

Gray-Bonney Electricians' Screw Drivers are designed with the care and precision so necessary in screw drivers of this type. The blades are forged from special alloy steel, and are heat treated over their entire length. All drivers, regardless of length, are made from $\frac{3}{16}$ " stock, which makes them invaluable for reaching hard-to-get-at-screws. The handles are made of tough transparent composition, and are non-conductors of electricity.

No.	Length of Blade	Width of Tip	Overall Length	Dealer Net
003	3"	$\frac{3}{16}$ "	$6\frac{1}{2}$ "	\$1.13
006	6"	$\frac{3}{16}$ "	$9\frac{1}{2}$ "	1.24
0010	10"	$\frac{3}{16}$ "	$13\frac{1}{2}$ "	1.43

Electricians

Round Shank

Gray-Bonney Round Shank Screw Drivers are somewhat lighter than the square type, and are ideal for automotive mechanics. They are made with blades ranging from 4" to 12", and all tips are taper ground, with the entire length of the blades finely polished. The handles are made of moulded composition, and in addition to being extremely durable, are designed to give the user a secure yet comfortable grip. The blade is forged from alloy steel and carefully heat treated over its entire length.

These screw drivers are ideal for electrical work as the handles are non-conductors of electricity.

No.	Length of Blade	Width of Tip	Overall Length	Dealer Net
04	4"	$\frac{1}{4}$ "	$7\frac{3}{4}$ "	\$1.39
06	6"	$\frac{5}{16}$ "	$10\frac{1}{4}$ "	1.88

012	12"	$\frac{7}{16}$ "	$17\frac{1}{2}$ "	3.15

Round Shank

Care of Screwdrivers

We frequently receive screwdrivers for grinding which have been used where a tire iron or chisel would have been more suitable. This practice does not save time and usually results in spoiling a good screwdriver.

Wood Handle

Gray-Bonney Wood Handle Screw Drivers are made with the same high grade materials as used in the more expensive drivers. Blades are forged from alloy steel, and are securely anchored in the handles, which are of selected, hardwood and beautifully finished.

Tips are taper ground, and the fluted handles give a firm yet comfortable grip. These screw drivers are ideal for mechanics, carpenters, and electricians, and are excellent value.

**NOW AVAILABLE
in
FOUR MODELS**

1. SENIOR
2. JUNIOR
3. INSERT
4. JUNIOR INSERT

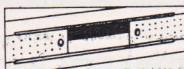

If you've wanted a fireplace for a room in your home or cottage, here is the answer to your wish!

Just right for living room, bedroom, recreation room or studio — can be used almost anywhere. Comes to you as a complete unit — easy and quick to install — a simple "do-it-yourself" job. Marvellously efficient. Burns wood, coal or gas.* Enjoy perfection — see the new STARFIRE by CONTINUE-FLO.

F E A T U R E S

Solid brass doors and trim with japanned enamel casing.

Scientifically controlled draft ensures maximum use of fuel.

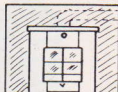

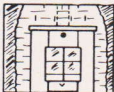

Fiberglass insulation at back and sides insures heat reflection to room area.

High efficiency from large heat exchanger area. For maximum radiation.

Easy to clean — lift out ash drawer for simple cleaning.

Prefabricated — easy to install. Comes complete — ready to use, and can be installed almost any place.

Shadow panel and clock available at extra cost.

ZONE CONTROL-WARM AIR

The Y319B zone control package contains all controls required for two-position control of one zone of a zoned forced warm air heating system. It is used to control the second, third, and fourth zones and is connected into the zone control system at the Q1A Zone Power Box furnished in the Y319A package. The Y319B package includes: T86A Round Thermostat, M828C Damper Motor, Q245A Auxiliary Switch, Q257A Damper Linkage with 4" push rod, AT72D Transformer, and installation fittings. Order burner controls separately.

Y319B ZONE CONTROL PACKAGE

THERMOSTAT RANGE: 55 to 85 F.

VOLTAGE AND FREQUENCY: 115 volts, 50 or 60 cycles standard.

MAXIMUM MOTOR LOAD: 8 lb. at extreme radius of damper arm,
16 lb. at shortest damper arm setting.

WEIGHT: 10 lb.

SETS PER CARTON: 1.

SPECIAL FEATURES AVAILABLE:

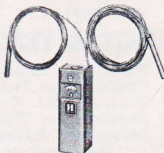

- Special voltages and frequencies: 115 volts, 25 cycle; 230 volts, 25 or 60 cycles at extra cost
- Q257A Damper Linkage with 30" push rod at extra cost.

WHEN ORDERING SPECIFY:

1. Package set number (Y319B).
2. Voltage and frequency.

T835A OUTDOOR RESET CONTROL

MODEL: T835A Outdoor Reset Control.

TEMPERATURE RANGE: 80 to 140 F.

DIFFERENTIAL: Unscaled and subtractive, adjustable approx. 7 to 25 degree. Factory set at minimum. Adjustable to approx. 65 deg. max.

ELECTRICAL RATING: 2 amps inductive at 24 volts A.C.

RESET RATIO: 1 to 1 (1 deg. outdoor temperature drop causes a 1 deg. increase in bonnet temperature).

DIMENSIONS: Plenum and outdoor bulbs— $\frac{3}{8}$ " diameter, 4" length (including seal-off). Tubing length—Outdoor (including bulb) 30 ft. Indoor (including bulb) 10 ft. Case—Height $5\frac{3}{8}$ ", width 2", depth $2\frac{1}{4}$ ".

MOUNTING: Case—Screws through mounting holes in back of case. Outdoor bulb—Guard with supporting clip and wood plug for tubing wall seal furnished. Plenum bulb—Bulb holder and plate for tubing plenum seal furnished.

SPECIAL FEATURES AVAILABLE:

Refer to current Price Index for any special prices.

BACHARACH HEATING SERVICE INSTRUMENTS

These instruments are real time-savers and goodwill builders in installation and service work. Equally important, they are the foremost tools in selling replacements and fuel-saving services—leading to new sales, new profits, and new business-building opportunities.

TRUE-SPOT SMOKE TESTER

NET PRICE \$25.70

Indispensable for checking burner for clean fire, simply by drawing, with ten pump strokes, a sample of the combustion gases from the furnace flue, and comparing discoloration of the test paper with the smoke shadings on a unique Oil Burner Smoke Scale. In connection with the FYRITE CO₂ Indicator this smoke test enables adjusting burner for the highest CO₂ without objectionable smoke.

TEMPSCRIBE RECORDERS

\$70.00 Net

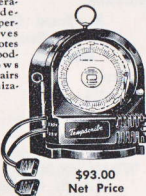

Air Temperature

Style CT

Gives total running time, as well as exact time of on and off periods of gas and oil burners, blowers of furnaces, and cooling and refrigerating equipment. Pen is actuated by an electro-magnet built into hinged front door of instrument.

Widely used for recording new installation performance, balancing heating systems of every kind, trouble-shooting on service calls, and recording outdoor temperatures for "degree day" operations. Saves time, promotes customer goodwill, shows need for repairs or modernization.

\$93.00
Net Price

NEUTRAL PRESSURE POINT INDICATOR

A super-sensitive gauge designed specifically for gas conversion burner tests. Indicates, instantly and reliably, furnace draft or pressure of as little as 1/1000 inches W. Suitable for all draft tests specified in AGA Installation Standards for Gas Conversion Burners.

\$13.60 Net Price

FLORITE AIR VELOCITY METER

\$55.00 Net Price

Available in 2 Ranges
• 0-1000 Ft./Min.
• Double Scale
0-3000 Ft./Min.
0-35 Miles/Hr.

A practical, accurate air velocity meter for heating, air conditioning, and ventilating work. Indispensable for checking rate of air delivery, balancing the system, and adjusting register deflecting vanes for "draft-free" air distribution. Has unique scale lock which enables retaining reading until lock is released.

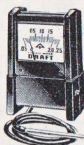

FYRITE CO₂ INDICATOR

The basic tool in fuel conservation sales and service. Outstanding for lastingly dependable service and strikingly functional design. Accurate within 1/2 of 1% CO₂. A CO₂ check-up with it takes less than a minute; requires no skill or special training. Comes complete with sampling tube, aspirator bulb, rubber tubing, and the unique Fire Efficiency Finder, all packed in steel carrying case.

Net
\$50.50 Price

DRAFT GAUGES

All-Purpose Style

Reads .25" W on 3-inch scale. Has free movement at zero to indicate "puff-backs." Accuracy does not depend upon careful leveling. Two ranges: 0.25" and 1.0" water, respectively.

Net
\$35.50 Price

Pocket Style

Compact, handy... inexpensive—most practical draft gauge for natural draft "pot" type burners. Comes with 2 section tube, 5" long; all packed in leatherette case. Two ranges—0.14" and 0.25" water, respectively.

Net
\$12.50 Price

STACK THERMOMETERS

Dial Type \$11.00 Net Price

RANGE
200°—1000° F.

Large dial and numbers make it as easy to read as a clock. Has steel sleeve holder for mounting in flue pipe; convenient handle for withdrawing from hot flue pipe.

Pocket Style \$9.80 Net Price

RANGE
100°—950° F.

High quality mercury-in-glass thermometer. Annealed glass; and pressure filled for maximum shock resistance.

GAS PRESSURE GAUGE

This gauge has been developed specifically for gas service men and heating dealers for checking manifold pressures on gas heating units for compliance with the requirements of the local gas companies and the AGA Installation Standards.

Available in two ranges:
one with scale 0-7" W; and
one with a scale 0-15" W on
one side and 0-8.5 ounces per
sq. in. on other side.

7" size—Net

BACHARACH SERVICE INSTRUMENTS (Cont'd.)

CROSS LEVEL

Indispensable for installing oil space heaters, to level burner and oil flow control; also used to level condensing units of commercial cooling and freezing equipment. Shows level in both directions.

NET PRICE \$5.70

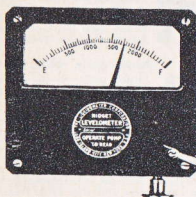

MODEL-MED-FILTER GAUGE

Automatically and unfailingly indicates the exact time that filters on forced air heating, cooling or ventilating units should be cleaned or replaced. When dirty filter is allowed to remain in furnace or air conditioner the unit loses efficiency and can even become inoperative. This gauge reminds users of the filter's importance—reduces emergency calls and service complaints. Easy to install on any type heating or cooling equipment—requires only drilling of four 1/4" holes through wall of unit. Can be adjusted conveniently, accurately to any kind of system or filter.

BACHARACH SERVICE INSTRUMENTS

For HEATING • AIR CONDITIONING • REFRIGERATION

These instruments are real time-savers and goodwill builders in installation and service work. Equally important, they are the foremost tools in selling new equipment and replacements — leading to new sales, new profits, and new business-building opportunities.

The instruments shown here have been developed specifically for the Heating, Air Conditioning and Refrigeration Trades to make the tests recommended by industry in connection with sale, installation and inspection of heating, air conditioning and refrigeration equipment and the sale of fuel.

FYRITE SERVICE KIT

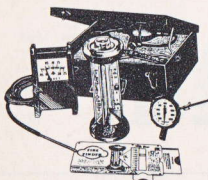

This kit provides a very economical, yet complete set of combustion-testing instruments.

KIT CONTAINS

FYRITE CO₂ Indicator with Bulb Assembly, DRAFTRITE Draft Gauge, TEMPOINT Dial Thermometer, Fire Efficiency Finder Stack Loss Slide Rule.

Net Price \$74.00

FYRITE MASTER KIT

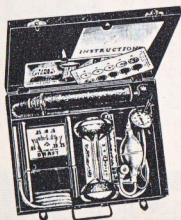

This kit provides a superior assortment of combustion-testing instruments — each being the last word in quality, professional appearance and operating convenience. The kit is a valuable asset to any heating business.

KIT CONTAINS

FYRITE CO₂ Indicator with Bulb Assembly, Model MZF All purpose Draft Gauge, TEMPOINT Dial-type Thermometer, Fire Efficiency Finder Stack Loss Slide Rule.

Net Price \$99.00

FYRITE UTILITY KIT

This kit contains instruments for combustion efficiency tests, as well as for determining smoke density in the flue gases. With the smoke tester it is possible to adjust a burner for highest combustion efficiency, as well as for clean burning of the fuel.

KIT CONTAINS

TRUE-SPOT Smoke Tester, FYRITE CO₂ Indicator with Bulb Assembly, Model MZF All Purpose Draft Gauge, TEMPOINT Dial-type Thermometer, Fire Efficiency Finder Stack Loss Side Rule, Oil Burner Smoke Scale.

Net Price \$128.00

Fire-chief

factory built Safety Chimney

Installs in Two Hours

Improves Furnace Performance

Everything that makes a chimney better is combined in a Fire-chief. It is packed with features that make it first for safety, efficiency, fuel savings, economy and easy installation. Light weight, factory built, precision fit sections erect fast without special tools or experience.

Fire-chief SIX[™]

The Fire-chief SIX" — air insulated for economy and efficient operation, is ideal for homes with Domestic size Pressure Atomizing Oil or Gas fired furnaces. Strait-Thru Economy Model also.

Fire-chief SEVEN[™]

The Fire-chief SEVEN" — perfect complement to the modern house — is an impressive example of scientific chimney design and construction. Combines outstanding performance and complete safety with durable good looks.

Fire-chief TEN[™]

The Fire-chief TEN" — for extra capacity, residential, commercial, industrial — is perfect for the small plant, service station, apartment or office building. The stainless steel Dura-Flue liner has enlarged 10-inch flue capacity . . . permitting fast flow of gases.

Representing a revolutionary new principle in ventilator design, the Breidert Air-X-Hauster converts the power of air currents blowing in any direction into a suction force never before approached.

Totally Different . . . In design and operation, the Breidert Air-X-Hauster is unlike any other ventilator on the market. Most ventilators work efficiently only when the wind strikes on a horizontal plane, but the Breidert Air-X-Hauster provides positive ventilation no matter which way the wind blows. It remains absolutely stationary . . . there are no moving parts to jam or get out of order . . . no operating or maintenance expense.

Based on Aerodynamic Principles . . . The scientific design of the Breidert Air-X-Hauster is based on the natural principle that air always rushes in to fill a vacuum. Wind currents striking the Breidert Air-X-Hauster from any direction create a vacuum which causes fumes and smoke to be steadily siphoned out of the stack or chimney. Up or down wind currents do not impair the efficiency of the Breidert Air-X-Hauster.

Back-Drafts Eliminated . . . It is impossible for the positive suction action of the Breidert Air-X-Hauster to be reversed. Back-drafts are completely eliminated where there is no interior negative pressure!
